

Goerlitz Zero

It's compact size with easy sterilization and deodorize !
Room Deodorizer & Sterilization process with ozone collecting function.

Characteristic of Goerlitz

- 1) Increase in generated amount of ozone.
- 2) Regardless of its size and lightweight, it generates maximum 1500mg/h of ozone which can deodorize properly.
- 3) Compare to the previous version, this machine increased the power by three times and it can deodorize in a very short time.

Compact size

The design is very compact and lightweight that even women can easily carry it with one hand. Its total weight is about 2 kg which is approximately 1/2 weight compare to the previous versions.

Easy maintenance

Dust can hardly sticks to ozone generator(discharge blade) so it's not necessary to clean. You can easily replace the discharge blade and the filter by yourself.

Reliable and safe timer control.

Since we set the idling time before ozone generates, you have time to leave the room before ozone generates. After the task ends, it automatically start to collect ozone. It is safe because you don't have to enter a room while ozone is generating.

Specification

Item	Contents
MODEL	Goerlitz / G-zero
Use	Deodorize & sterilization + collection
Ozone generation	1500 mg/hr
Air flow of fan	4 m ³ /hr
Timer	1 ~ 180 mins / nonstop
Processable area	120 m ²
Size	250W×200D×160H (Handle L40)
Weight	(Body)1.8kg , (AC adapter) 0.4kg
Power supply voltage	AC100V ~ 240V 50 / 60Hz
Power consumption	90W
Temperature range	0 ~ 40°C

Sterilizing effect

Measurement by a third-party laboratory
