| Size | 300mm × 300mm × 60mmt |
| Weight | 850g/pcs |
| Cell | 120cell/inch ² |
| form | Colgate Honeycomb |

Low pressure loss

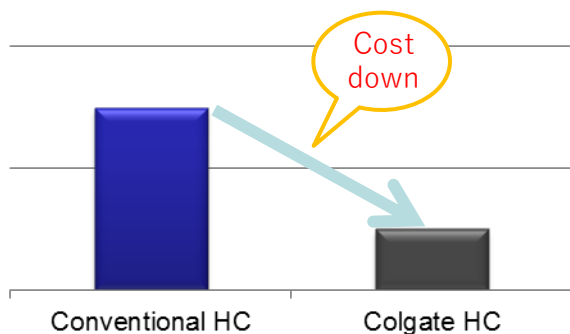

Because of honeycomb form, this filter has big absorb area. This filter is low pressure compare with crashed carbon.

Light weight

This filter made from fiber its contains activated carbon. Therefore it's very light weight compare with conventional honeycomb carbon. When it's install, it is unnecessary filter cartridge.

Low Price

This filter achieved big cost down because of following 3 reason.

1. A raw material can be made inexpensively.
2. It is unnecessary filter cartridge.
3. It can use fast LV situation.(The filter area will be small.)

Installation method

1. Firstly, the casing box connect into the duct.
2. 2ndly, the filter install to casing box.
